

PLASTIC & RECONSTRUCTIVE SURGERY

2008

Established in 1988

Thank you for your interest in our surgical instruments and for requesting a copy of our Plastic and Reconstructive Surgery Catalog. You may view the catalog on our website, as well.

Please note we have added a significant number of new instrument patterns since this catalog was printed. For pricing and item numbers of new instruments please call, fax or email us with your request.

Our instrument selection meets a variety of clinical and surgical needs for the specialties of Plastic Surgery, MOHS/Micrographic Surgery, Cardiovascular, Neurosurgery, Dermatology, General Surgery, Otolaryngology, and Ophthalmology.

We can cross-reference instrument patterns from major companies, including, but not limited to the following:

Codman
Jarit
Miltex
Padgett

Richards
Scanlan
Sklar
Snowden-Pencer

Storz
Tiemann-Bernsco
V. Mueller
Walter Lorenz

Expert repair services are provided for all hand-held surgical instruments, regardless of the manufacturer. Additionally, our mobile on-site repair service is provided to our customers located in the Dallas-Fort Worth area.

Fax	817-656-7108
Orders@VanSickleInstruments.com	

TERMS

Terms are net 30 days from date of invoice. A service charge of 1½% per month will be charged on all past due accounts.

SHIPMENT OF GOODS

Your order will be shipped by the most economical means, unless otherwise specified by customer. Shipments are FOB Colleyville, Texas. Shipping charges will be prepaid and added to the invoice. Any errors in the shipment must be reported within 48 hours of receipt of goods.

PRICING

Prices that are listed in the current price list are subject to change without notice.

RETURN GOODS POLICY

All returns must be accompanied by a Return Goods Authorization (RGA) number, available by calling our customer service department. The Van Sickle invoice number, invoice date and customer purchase order number must be provided in order to obtain authorization.

Full credit will be issued on unused merchandise within 30 days of invoice date. A 25% restocking charge will apply to unused merchandise returned after 30 days. No returns will be accepted after 90 days of invoice date. No returns will be accepted on used, special order or discontinued products.

GUARANTEE

Van Sickle instruments are guaranteed to be free from manufacturing defects in materials and workmanship if used for their intended surgical purpose and properly maintained. Any Van Sickle instrument which proves to be so defective will be repaired or replaced at our discretion, free of charge.

TRADEMARKS

The following are registered trademarks of Van Sickle Surgical Instruments, Inc.:

 , Van Sickle, Master Line, Mastercut, Mastercut STC, Mastergrip.

MASTERCUT™ SCISSORS

Mastercut™ Scissors feature a razor-like edge on the upper blade for unparalleled sharpness and a serrated lower blade which prevent tissue slippage. Mastercut™ Scissors allow for a clean, precise cut of dense, fibrous and calcified tissues.

MASTERCUT STC™ SCISSORS

Mastercut STC™(Serrated Tungsten Carbide) Scissors feature high quality tungsten carbide inserts that are diamond ground and honed to a precise edge for superior cutting action. The diamond cut, micro serrations on the lower blade prevent slippage of problem tissue.

MASTERGRIP™ NEEDLE HOLDERS

Mastergrip™ Tungsten Carbide Needle Holders feature hard, diamond cut teeth inserts of hardened tungsten carbide bonded to the jaw of the instrument. These highly durable inserts securely grip the needle, preventing it from rotating or slipping. Our "No Catch" box lock prevents suture from snagging.

MASTERGRIP™ NEEDLE HOLDERS

Mastergrip™ Tungsten Carbide Needle Holders feature hard, diamond-cut teeth inserts of hardened tungsten carbide bonded to the jaw of the instrument. These highly durable inserts securely grip the needle, preventing it from rotating or slipping. Our "No Catch" box lock prevents suture from snagging.

SWISS THERAPY SKIN SHEETS

- 40-210 10cm x 10cm x 3.3mm sheet (approximately 4" x 4") 5/pack

Composition: consists of gelable polysaccharide and the cross-linked absorbent polymer of an acryl derivative.

Properties: smooth surface; pliable and can adapt itself to the shape of the face, neck, arm or any area of the body; high water content and is permeable to salts, nutrients, antibiotics, and proteins of higher molecular weight; ensures wound ventilation and forms a protective barrier; excellent for use in cold therapy due to its superior thermal transfer properties.

FIELDS OF USE

Surgery:

- In the preparation of the wound-base for free skin transplantation.
- In the treatment of the donor-site after the removal of split skin grafts in plastic surgery.
- For covering superficial operation wounds to prevent exposed Brady-trophic tissue (tendons, periosteum, bone or cartilage) from drying out.
- Following any surgical procedure which requires cold therapy for reduction of edema and patient discomfort.

Dermatology:

- In the treatment of both fresh and chronic damage to the epithelium, e.g. after dermal abrasion or laser resurfacing.
- To encourage granulation and the formation of cellular tissue in chronic ulcers, especially crural ulcer, decubitus sores, etc.
- In the treatment of patients with polyvalent allergies when other forms of dressings and external applications are contra-indicated.
- In the treatment of superficial thromb-phlebitis in combination with external therapeutic measures used in such cases.

REPAIRS

Van Sickle provides expert repair services through our own on-site repair shop. This repair service is provided for all surgical instruments, regardless of their manufacturer.

Upon receipt, all instruments are thoroughly cleaned and evaluated. Adjustments and repairs are performed. The instruments are re-polished, re-passivated and tested prior to their return.

INSTRUMENT CARE PRODUCTS

Van Sickle offers a complete line of instrument care products. Please contact our customer service department for product information.

CLEANING

Clean instruments properly after each use. The following steps should be taken to ensure long and trouble-free use of all your Van Sickle instruments.

1. Remove blood, saline, tissue and other contaminants immediately by rinsing with distilled water or a neutral pH pre-soak detergent. **Do not rinse in saline, stain removers, chloride, chlorine bleach or enzyme cleaning agents.**
2. A non-metallic scrub brush or pad should be used to remove stubborn debris. **Do not use abrasive pads or cleaning agents.**
3. Instruments should be cleaned in the open position by hand, ultrasonic cleaner or autoclave.

LUBRICATION

Lubricate your instruments.

1. Lubricate all instruments that have mechanical parts after every cleaning and before autoclaving with a steam or ETO permeable instrument lubricant.
2. Immerse instruments in open position for best penetration and protection.
3. Allow instruments to dry for a few moments prior to wrapping for autoclaving.

INSPECTION

Inspect instruments on a continual basis for broken, cracked, chipped or worn parts. Use instruments for their intended surgical purpose.
